

Chapter 6

3 Number Theory and Year Theory

The 3 number theory and the Year theory are the theories which were proposed by me. The 3 number theory is approved by the Indian Numerology and International Numerology groups. The Year theory is still under research as it is satisfied by only few people's data.

The 3 Number Theory :

This theory, as the name implies, has 3 numbers by which the life path of a person can be predicted. The 1st of the 3 number is the Basic Number. The 2nd number is the month of birth. The 3rd number is the Destiny Number.

Example 1:

If a person is born on the 20th of October 1987 i.e. 20-10-1987 .

$$\text{Basic Number} = 0+2 = 2$$

$$\text{Destiny Number} = 2+1+7= 10 = 1+0 = 1$$

$$\text{Month Number} = 1$$

$$\text{Basic Number} - \text{Month Number} - \text{Destiny Number} = 2-1-1$$

Hence this person at the start of his life will be dependent on someone, as his 1st part of life is ruled by Moon. But after sometime, he will understand the technique of living of life and shine like the Sun till his end. Hence, life of this person is a great improving life. Any work taken by him is supported by the sun.

Example 2:

Let us take the date of Leonardo Da Vinci. He was born on 15th April 1452 i.e. 15-04-1452.

$$\text{Basic Number} = 1+5 = 6$$

$$\text{Destiny Number} = 6+4+3 = 4$$

$$\text{Month Number} = 4$$

This person at the start of life lived in a homely atmosphere. From the middle part of his life, he organized himself and concentrated on his work/talent. Now, he is a very famous person in the history.

Example 3:

Let us take the date of Albert Einstein. He was born on 14th March 1879 i.e. 14-03-1879.

$$\text{Basic Number} = 1+4 = 5$$

$$\text{Destiny Number} = 5+3+7 = 6$$

$$\text{Month Number} = 3$$

Since, his life started at 5, he suffered as his feelings were not understood by others. But, from the middle part of his life, he went into the part of education due to 3 and finally he reached the destiny number which is the creative and loveable Einstein.

Year Theory :

By the Year theory, the number which is obtained by adding the year of birth, can be added to that year to get the most important incident of a person. This theory can be proved by taking Adolf Hitler as an example.

Example :

Adolf Hitler was born on 20th April 1889 i.e. 20-04-1889.

$$1+8+8+9 = 26$$

Therefore , adding 26 to 1889, we get 1915.

1915 was the year when he survived death.

$$\text{Now, } 1+9+1+5 = 16 .$$

Now, adding 16 to 1915, we get 1931.

1931 was the year when he became the dictator of Germany.

$$\text{Now, } 1+9+3+1 = 14.$$

Now, adding 14 to 1931 we get 1945.

1945 was the year when he became died.
